```java
import com.sun.org.apache.regexp.internal.recompile;

/**
 * This object stores the tick number in the second and a channelid that is fired on
 that tick
 */

class TickPattern{
    private int tick; // in range from 0->999
    private int channelId; // this is fired
    public TickPattern(int tick, int channelId){
        this.tick = tick;
        this.channelId = channelId;
    }

    public int getTick(){
        return tick;
    }

    public int getChannelId(){
        return channelId;
    }
}
```
